

Cosmetic Dyes

EXPERTISE IN COLORS

Dyes, Pigments,
Pigment dispersions, Pearls,
Surface treatments applied on
pigments and pearls...

As a primary manufacturer of certified dyes and pigments and enjoying the successful color expertise of Sensient group, we offer globally compliant colors, specialty blending, surface treatments, specialty milling and pigments dispersions to satisfy your most demanding individual requirements.

Sensient Cosmetic Technologies

is committed to developing, producing and marketing quality ingredients and colorants to the cosmetics industry. At our global production facilities, we manufacture the finest colorants and functional cosmetic ingredients for Make-up, Skin care, Hair care, Personal hygiene, Oral care, Fragrance.

EXPERTISE IN COLORS

Consistent quality

All manufactured batches undergo rigorous testing to guarantee consistency, purity and reliability, to ensure our products meet our customers' strict demands.

Regulatory support

With our knowledge of cosmetic ingredient regulations, use limits and labelling requirements, we assist customers with manufacturing and product development needs.

Technical expertise and Application Laboratories

Our well-equipped technical service laboratories are staffed by experienced cosmetic technologists available to assist you in all technical needs.

We promise efficient, accurate and innovative solutions to your most pressing development questions.

Customer service

Our customer department provides fast and courteous responses to pricing, availability and order tracking.

We constantly stand by our customers' side with :

- Innovation
- Technical expertise
- Formulation development

Contact our sales team to enjoy our innovations and high performance products.

Cosmetic dyes

As the world's leading manufacturer of high quality colors, Sensient offers an extensive range of natural and synthetic colors around the world.

Synthetic dyes

Sensient Cosmetic Technologies has a complete range of synthetic colors manufactured to the highest standards for the cosmetic market. They include FD&C, D&C and Ext. D&C dyes but also EC food dyes in powder form.

Thanks to the undisputed leadership of Sensient group in synthetic colors, our products are designed to unlock valuable opportunities, provide optimum performance and present superior solutions for cosmetic formulations.

The product ranges, Unicert-J, Dyes-C, Phat and EC food dyes, contain synthetic water-soluble and oil-soluble colors conforming to cosmetic color regulations.

Natural dyes

Sensient Cosmetic Technologies presents Natpure Col, an extensive range of specialty natural dyes from vegetal renewable sources. All the products meet purity criteria and characteristics set by the Food Regulation 231/2012/EC. Combining the expertise and application know-how in natural colors, Sensient offers superior products with respect to stability, quality and safety.

Association with color protectors :

We recommend the use of color protectors from Covabsorb range, three proprietary blends of organic UV absorbers with anti-oxidant properties to overcome frequent light stability problems occurring in formulation. Covabsorb (oil soluble) is broadly used in perfume and skin care, Covabsorb DS is the perfect solution for shampoo, shower gel, serum, gel and mouth wash (all water based formulations with a pH below 6,6) whereas Covabsorb EW (water soluble) will be preferred for liquid soaps, cleanser, serum and gel (all water based formulations with a pH higher than 6,6).

Unicert-J for a global compliance

Unicert-J range is the first generation of colors in compliance with European, American, Japanese and Chinese cosmetic regulations. These dyes are manufactured internationally by Sensient Technologies in Mexico, Europe and the USA. A sample from every manufactured batch is submitted to the Color Certification Branch of the FDA who certifies the compliance with the defined specifications. UNICERT-J batches are then specially selected for their additional compliance with the European Cosmetic Regulation 1223/2009/EU (Food Regulation 231/2012/EU for the food grades) while also conforming to the specifications given by the Japanese and Chinese regulations. To insure regulatory compliance, Sensient Cosmetic Technologies performs supplementary analyses and controls, not imposed by the FDA, but specified in the mentioned cosmetic regulations.

The group of products presented in this brochure will enable the user to obtain the best possible results from the standpoint of tints and general suggested use. However, we would recommend that users of our products carry out all necessary tests to determine their suitability for use in a given formulation.

Regulation

Our products meet the requirements of one or more of the following regulatory standards :

Europe

European Cosmetic Regulation 1223/2009/EU (including amendments), Annex IV.

USA

CFR - Code of Federal Regulations Title 21

Japan

Ministry of Health, Labor and Welfare Ordinance No. 126 of July 29, 2003

China

Hygienic Standard for Cosmetics, July 2007
