

# CAMELINA GOLD

## GOLD OF PLEASURE

### INCI NAME:

Camelina sativa seed oil

### DOSE OF USE:

1- 10%

### SOLUBILITY:

LIPOSOLUBLE

### PRESERVATIVE:

PRESERVATIVE FREE

### COSMETIC USE:

- › Anti-aging
- › Natural Antioxidant
- › Emollient
- › Moisturizing
- › Improves Skin Elasticity
- › Hair Conditioner

### DESCRIPTION:

**CAMELINA GOLD** is a refined botanical oil obtained from the seeds of *Camelina Sativa* by cold pressing process, produced in a completely sustainable and environmentally friendly way in Spain.

*Camelina Sativa* is an ancient oil seed crop that belongs to the Brassicaceae family.

The flower is also known as **Gold of Pleasure**.

Camelina oil has been used in **traditional medicine** and as food for years. Seeds of the crop were found in archaeological excavations from the **Bronze Age** in Scandinavia.

**CAMELINA GOLD** provides large amount of vitamin E and a unique balance of omega fatty acids to the skin.

This nourishing plant oil maintains **skin elasticity, moisturization and protection**.

**CAMELINA GOLD** is a rich source of omega-3,6 and 9 fatty acids, combined with a **unique antioxidant complex** makes this oil incredibly stable.

When applied topically, it was observed a healing effect on bruises, skin scratches, squeezing and sprains as well as skin diseases (e.g. acne) and inflammations (Rode, 2002).

### PROPERTIES:

#### ▪ Emollient & Anti-Inflammatory:

**CAMELINA GOLD** strongly inhibits inflammation due to its high poly-unsaturated fatty acids content, characterized by a **rich and unique balance in omega-3,6 and 9** not found in any other plant:

**CAMELINA GOLD** brings moisture to the skin and helps it to improve and maintain a healthy barrier function.

#### ▪ Powerful antioxidant:

Antioxidants reduce UV-induced photodamage, signs of skin aging, and inflammatory skin responses.

- ✓ **High vitamin E content:**  $\gamma$ -Tocopherol
- ✓ **Phytosterols:** Brassicasterol, Campesterol, B-sitosterol, Stigmasterol, Avenasterol
- ✓ **Polyphenols and flavonoids**

#### ▪ Hair Conditioner:

Provides a protective coating for hair follicles holding water retention.

Because of its high antioxidant content, protects hair fibers from oxidative damage preventing photo-oxidation.
